Skills

Technical Skills : React Js, DSA in C++ , Tailwind CSS , Javascript ,HTML, CSS ,Bootstrap 5,

CS Fundamentals : OOPS ,

Tools : Visual Studio Code ,git ,Github

Projects

- **Foodify** : <https://main--fodify1911.netlify.app/>
- Developed a dynamic Food Ordering Web Application integrating Swiggy and GitHub Profile API for real-time data retrieval using the CORS method, facilitating access to 50+ restaurants.
- Implemented advanced features including optimized search functionality, lazy loading, and a shimmer effect to enhance user experience.
- Utilized React.js for creating a dynamic and responsive UI, integrated Redux for efficient state management, and employed Parcel with Babel for optimized bundling.
- **Netflix GPT** :
- Engineered a Netflix Clone Application powered by GPT-3.5 API, providing AI-driven movie recommendations exceeding 1000 titles, complemented by genre-based filters and live trailer previews for enhanced user engagement.
- Ensured secure user authentication through Firebase, leveraging Firebase documentation for error handling and custom error message notification via three-stage form validation.
 - Orchestrated dynamic data retrieval from TMDB REST API, employing Redux store management via Movislice and custom hooks, adeptly resolving intricate bugs pertaining to user profile updates and login redirects

Education

Bachelor Of Engineering in E&TC Engineering	2023
Sinhgad College of Engineering, Pune cgpa: 7.5	
12th , HSC	2018
Shri Datta Science Collage ,Hadgaon 61.08%	
10th , SSC	2015
Madyamik Vidyalay Unchegaon bk 77%	

Achivements

- Solved 350+ DSA problems on Leetcode.
- Mastering React.js with Akshay Saini's Namaste-React course, culminating in the successful delivery of two impactful projects revolutionizing food ordering and entertainment discovery
